

Ruslan Kurmashev, MD

Computational and translational researcher | Autism and neurodevelopment
Dublin, Ireland | ruslan-kurmashev.github.io | ORCID 0009-0006-7588-5319 | [Google Scholar](#) | [GitHub](#)

PROFILE

Medical doctor and computational biology researcher working on heterogeneity in autism and neurodevelopment. Research spans cross-dataset machine learning, structural neuroimaging, transcriptomics, neurogenetics, RNA biomarkers and early-identification pathways, with an emphasis on reproducibility, external validity and clinically meaningful interpretation.

EDUCATION

2024-present	MSc Computational Biology, Munster Technological University, Ireland Computational approaches to autism and neurodevelopment, biomedical data analysis, transcriptomics, neuroimaging and machine learning.
Completed 2021	Medical education and General Practice internship, S.D. Asfendiyarov Kazakh National Medical University, Kazakhstan Clinical training providing the foundation for later work in neurodevelopment, healthcare and translational biomedical research.

RESEARCH PROGRAMME

Computational robustness

ACADEMIC SERVICE AND LEADERSHIP

International Council for Sensory Integration Practice Inc. (SIP Council). Board Director and Secretary of the Corporation; Director, Academic Publishing and Journal Development.

AISI Journal of Sensory Integration and Child Development. Journal Development Editor, contributing to indexing readiness, editorial policy, reviewer development, author outreach and publishing infrastructure.

Conference programme review. 65 documented abstract reviews across INSAR Annual Meeting, ISCB-UK 2026, DADD Annual Conference programme and ISCB Student Council Symposium 2026.

Journal peer review. Reviews and acknowledgements across JMIR and other journals including *Brain Imaging and Behavior*, *Journal of Neural Engineering*, *Journal of Disability Research* and *Journal of Open Source Software*.

IOP Trusted Reviewer. Reviewer recognition awarded in 2026.

RSG-Kazakhstan, ISCB Student Council. Founding President.

ISCB Student Council. Web Team Contributor.

Neuromatch Academy. Ambassador - Communications and Outreach.

RESEARCH AND PROFESSIONAL EXPERIENCE

Dec 2025-present	Volunteer Research Assistant - Department of Biological Sciences, Munster Technological University Computational and biomedical research in autism and neurodevelopment, including transcriptomics, structural neuroimaging, digital health, biomedical AI, reproducible analysis, evidence synthesis, manuscript development and conference outputs.
May 2026-present	Online Volunteer - Research Advisory Support for Public Health Manuscripts, WHO Country Office in Kuwait / UN Volunteers Methodological and scientific feedback on public-health research protocols and technical documents, including study framing, data sources, feasibility, transparency and reporting clarity.
Feb 2024-present	Healthcare Assistant - InisCare, Dublin Person-centred home-care support, safeguarding, care-plan implementation, documentation, handover and escalation of changes in condition.
2024-2025	Visitor Experience Assistant and Invited Trainer - Neurodiversity Communication, Explorium, Dublin Science engagement and staff training on autism-inclusive communication, sensory-friendly adaptations, de-escalation and respectful engagement with neurodivergent children and families.
Nov 2021-Dec 2022	Pediatric Neurorehabilitation / Adaptive Physical Education Specialist - Speech Launch Center, Almaty Delivered more than 250 structured sessions for children with autism and other developmental or neurological conditions, supporting motor, sensory, coordination and behavioural goals.
Sep 2019-Jun 2021	General Practitioner Trainee - Clinical Hospital No. 4, Almaty Supervised general medical care, clinical assessment, documentation, follow-up and multidisciplinary coordination.
Sep 2019-Oct 2022	Simulation Instructor - Kazakh National Medical University Simulation-based teaching across emergency medicine, surgery, obstetrics, paediatrics and core clinical skills.
Sep 2017-May 2019	Research Assistant - Department of Pharmacology, S.D. Asfendiyarov Kazakh National Medical University State-funded pharmacology project involving piperidine derivatives, experimental documentation, structured data capture, literature review and scientific reporting.

PUBLIC HEALTH AND POLICY CONTRIBUTIONS

Kazakhstan autism and inclusive-education work. Evidence-informed recommendations on early autism identification, interdisciplinary referral pathways, interagency case management, inclusive and special education, child-data protection and measurable implementation indicators.

Early Autism Diagnostic Cascade. Mixed-methods translational project focused on measurable failure points between developmental concern, screening, referral, assessment and support.

SELECTED AWARDS AND RECOGNITION

MTU Prize for Innovation 2026 - Best Social Enterprise Award. Autism School.

TITAN Health Awards 2026 - Silver Winner. Digital Services for Children and Young People, Autism School.

ISMB 2026 Conference Fellowship - US\$1,500. Competitive support associated with scientific participation and oral presentation.

IOP Trusted Reviewer - 2026.

METHODS AND TOOLS

Programming and data: Python, R, SQL.

Quantitative methods: statistical modelling, machine learning, transfer learning, domain adaptation, dimensionality reduction, validation and sensitivity analysis.

Biomedical data: behavioural/questionnaire data, structural neuroimaging-derived data, transcriptomic data, multi-site datasets.

Research practice: reproducible workflows, scientific writing, peer review, evidence synthesis, research reporting.
